Bordeaux - Lille

**international
preparatory cycle**

HEI · ISEN

JUNIA.COM

interested in international studies?

Junia HEI and Junia ISEN offer students the opportunity to join their international preparatory cycle.

The programme is open to both French and international candidates following successful completion of their high school diploma. Classes are in English: sciences, soft skills, and project management, with more computer science and mechanics options introduced in the second year.

The pathway gives the option of a third year outside France at one of our partner universities, such as Coventry University, and the opportunity to obtain an undergraduate degree or diploma. Students return to France for their fourth year at Junia HEI or Junia ISEN to earn their Master's in Engineering. Students also have the option of staying in France during their third year if they prefer.

advantages of the international preparatory cycle

- All classes are in English.
- Possibility to **earn a Bachelor's degree** from the host university.
- **Project-based learning and group work.**
- **Specialisation in Computer Science and Mechanical engineering** in the second year.

This preparatory cycle gives access to the Junia HEI and Junia ISEN graduate schools of engineering programmes.

Bachelor's degree from Coventry University*

Degrees awarded: BSc Informatics or BSc Applied Mechanical Engineering (internationally recognised classification).

**other partnerships under development*

programme

2 YEARS IN FRANCE IN ENGLISH

The first two years are taught entirely in English in France.

During the first year, students cover common core subjects, including sciences, soft skills and project management.

The second year consolidates this core knowledge and introduces more specialised modules in mechanics and computer science, which are prerequisites for the degree at Coventry.

POSSIBILITY TO EARN A BACHELOR'S DEGREE FROM HOST UNIVERSITY

Students spend their third year at one of the top-ranked International partner universities, such as Coventry University.

At the end of the third year, depending on the partnership, students may be awarded a Bachelor of Science from the host university.

international and practical!

As well as gaining a solid theoretical training, students benefit from project-centred teaching. Through group work they develop their interpersonal and soft skills.

Based in a young, vibrant and bustling city, Coventry University enjoys an excellent reputation in a variety of disciplines: engineering, computer science, business, arts and sciences. The university attracts 5,000 international students per year in the United Kingdom's 8th largest city. Coventry is just an hour from London by train and only 20 minutes from Birmingham.

how to apply?

ADMISSION REQUIREMENTS

- Scientific General Baccalaureate or an equivalent international high school diploma
- Minimum B1 level in English
- Submit an application on our online platform junia.force.com

TUITION FEES 2021-2022

- **EU tuition fees: €8,000 per year** (Years 1 and 2)
- **Non EU tuition fees: €9,150 per year** (Years 1 and 2)
- **Tuition fees for the third year are determined by the partner institution.**
